TESTIMONIALS

WHAT OUR CLIENTS SAY ABOUT US

"I just wanted to convey my thanks to the team for the first class support you've provided Ørsted.

Your company's flexibility and services made our challenges less so, notwithstanding the excellent attitude and professionalism of the technicians provided."

"As a new company in the wind turbine industry, Boston Energy has shown a good effort in providing us with good and experienced technicians. Good as well as bad situations have been handled quickly and in good fashion.

The majority of the technicians have been very competent and we have seen some of our top performers coming from Boston Energy."

"The report from our technicians was very positive and the cooperation with your guys was excellent.

Thank you for the good team and I look forward to further cooperation."

"I would like to take this opportunity to extend my thanks to you and your team for the service you've provided this season, not only the supply of trained, competent and approachable technicians but also the swift manner in which issues have been dealt with.

All of the Boston Energy technicians onsite have proved most valuable this season both in and out the field. The number of Hazard Observation submissions has been consistently good from the start and this goes to show the dedication and commitment to working in a safe environment."

"Huge compliments to the Boston Energy team for the job they have done, it has been a pleasure to work with you.

Thanks for working tirelessly during Christmas to facilitate, being great colleagues and showing passion for what we do."

HEALTH & SAFETY

Health and Safety is of paramount importance to Boston Energy; it is not just a tick box exercise. Our SHEQ Manager ensures our employees are constantly working safely and liaises with our customers to promote a site safety synergy.

Our Safety Management System is accredited to the highest level, along with our Environment, Quality and Statutory Inspection accreditations.

Risk Assessments, Method Statements & Work Instructions are task and site specific. They are written by experienced technicians and engineers.

We share safety alerts and updates with our technicians and create bespoke online toolbox talks on topical safety issues.

We promote health and wellbeing campaigns that include mental and occupational health.

Our SHEQ Manager visits sites regularly to spend time with site EHS specialists and our technicians.

We undertake random alcohol and illegal substance testing which is supported by the UK's leading authority on alcohol and substance misuse policy, along with a leading sample laboratory.

We work closely with our customers and support their health and safety campaigns and initiatives.
