

Environmental Policy Statement

The main activities of Boston Energy Ltd and Boston Energy Wind Power Services, and Boston Energy Europe Limited are;

- The provision of both supporting & fully managed technical services for the pre-assembly, installation, and service of offshore & onshore wind turbines .
- The development and delivery of certified lifting operations training and certified Global Wind organisation Training for the offshore & onshore wind industry

Boston Energy environmental impacts during the undertaking of their services have been identified, reviewed and controlled as far as is reasonably practicable. By setting environmental objectives which are regularly monitored and reviewed at management meetings, we aim to reduce these impacts further.

Boston Energy are committed to the protection of the environment including prevention of pollution, the reduction, reuse and recycling of waste products and a reduction in carbon emissions.

All relevant legislative requirements have been documented within the environmental legal register and will be monitored and updated as appropriate. The Companies are committed to fulfil their compliance and contractual obligations for the environment.

This environmental policy statement forms part of Boston Energy's Integrated Management System (IMS) for which we have commitment for continual improvement.

This Policy Statement will be reviewed on an annual basis or sooner if the need arises. It will be shared throughout the business and available to interested parties upon request.
