

Upskilling @ Boston Energy

Upskilling our technicians and ensuring they have every chance to enhance their skillset and career is one of our biggest targets for 2024.

Creating and helping to support internal opportunities for Boston Energy technicians such as Shift Lead and PFPE Inspector positions, as well as supporting our 'New Entrant' recruitment campaigns are just two examples of how my role at Boston Energy focuses on ensuring our technicians get the opportunities they deserve to grow their skillset.

We have also recently introduced our Women into Wind and Transferrable Skills recruitment schemes which has already allowed us to assist some fantastic new entrant technicians kickstart their career in the wind industry.

If you want to speak to us about enhancing your career, or would like to provide feedback to the Boston Energy team to help us improve our offering to you as technicians, keep an eye out for regular communications we will be sending out!

All the best,

Margo Jagiello

Head of Technician Development & Retention
